STARTUPS

- A company that is in the early or even very early stages of business.
- The founders usually finance their startups initially, trying to progressively attract external investment.
- Technology-based projects.
- They provide cutting-edge innovation and disruptive proposals.
- Scalable and fast-growing business models.
- High risk of failure, but at the same time, they can be very profitable businesses.

Digital Twin technology is one of the most thriving innovative trends in the startup ecosystem.

## WE WORK UNDER THE SMARTMONEY FORMULA

- 1) Financial resources through the acquisition of shares of its capital.
- 2) Connection with a vast network of companies and organizations within the construction sector.
- 3) Feedback from specialists in both construction and the startup ecosystem.
- 4) Network of connections with other international ConTech funds.
- 5) Planning and collaboration to raise the startup level and access new rounds of financing.
